Powerful & Efficient

Powered by a 1500W high-efficiency brushless permanent magnet motor, delivering robust thrust with a top speed of 14.5 km/h. Features three operating modes for seamless switching: variable speed control to meet diverse riding needs.

Thrust

21.5 KG

Power

1500 W

100W power for cruising at **5-6km/h**

400W power for cruising at **6-8km/h**

1500W power delivers a top speed of **14.5km/h⁺**

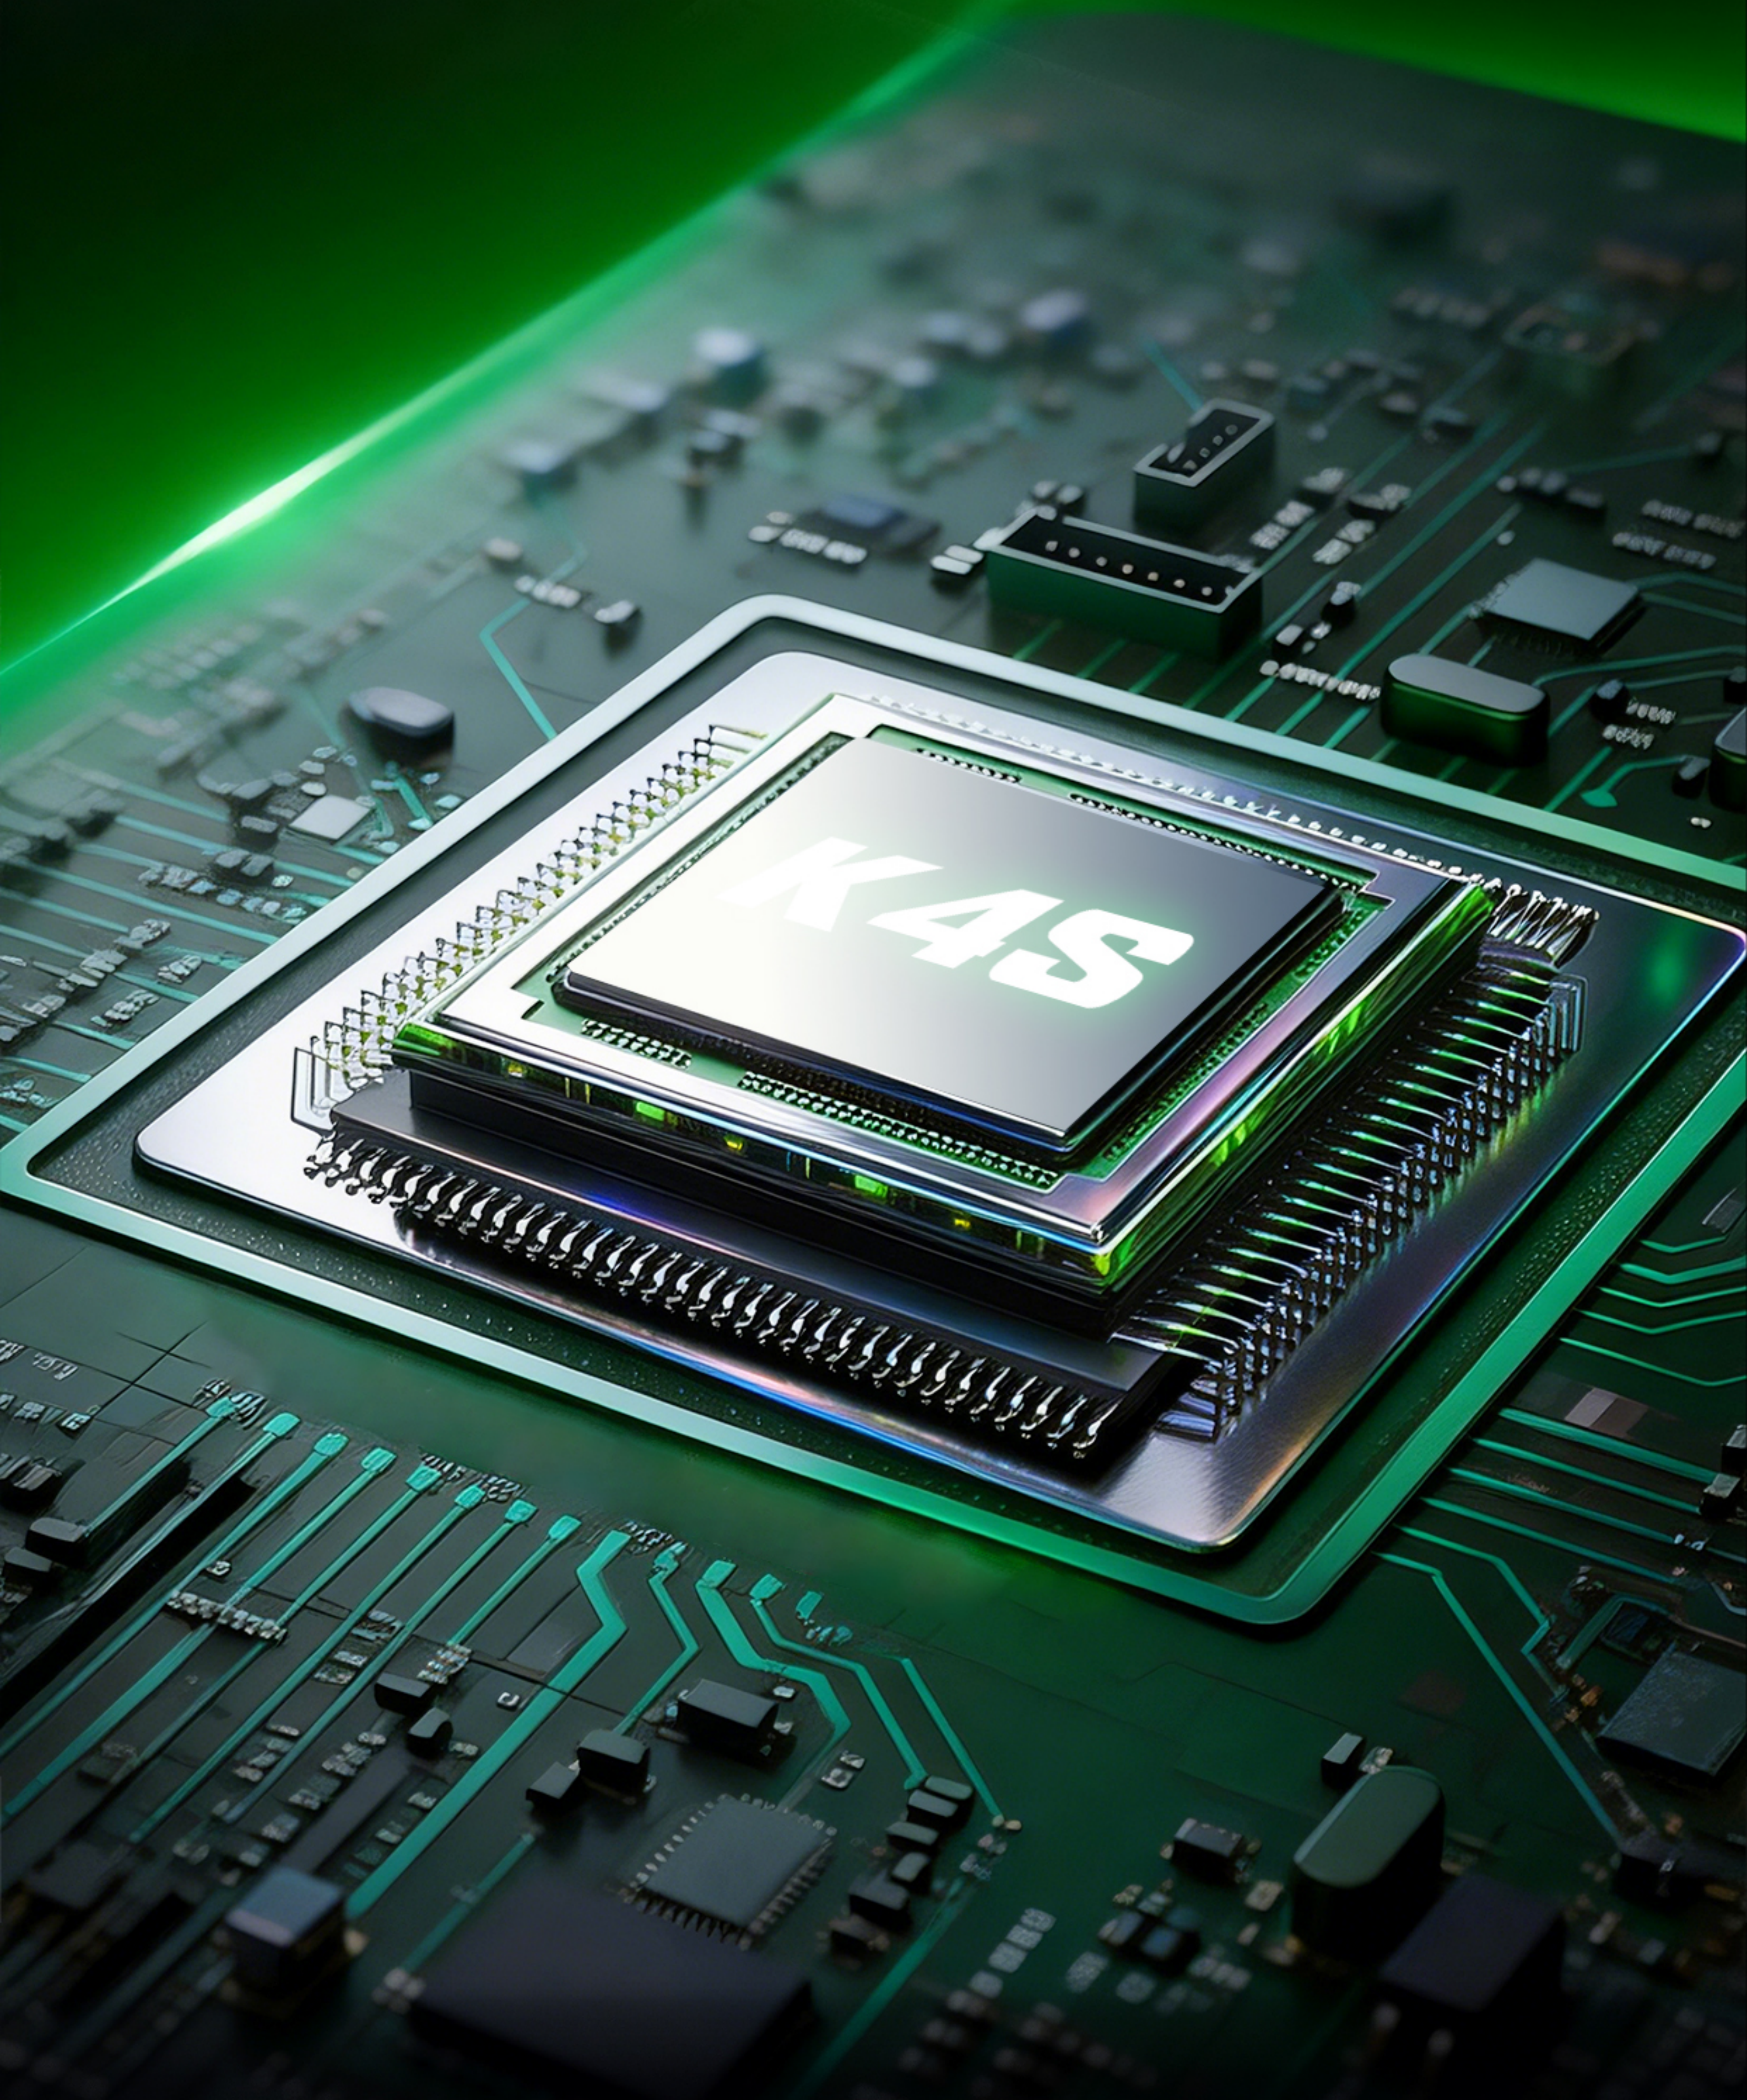

Smart Control Agile Maneuvering

Equipped with aviation-grade metal steering servos for precise left/right turns, empowering you to conquer waves with ease and experience the thrill of gliding across water.

Wireless Remote Millisecond Response

K4 SUP/kayak motor adopts advanced wireless control tech, which breaks free from traditional cable constraints for freer operation. With one-click pairing via the dedicated remote controller, you can start your water exploration journey effortlessly. The handheld remote enables flexible steering with millisecond-level response.

Smart Control Easy To Use

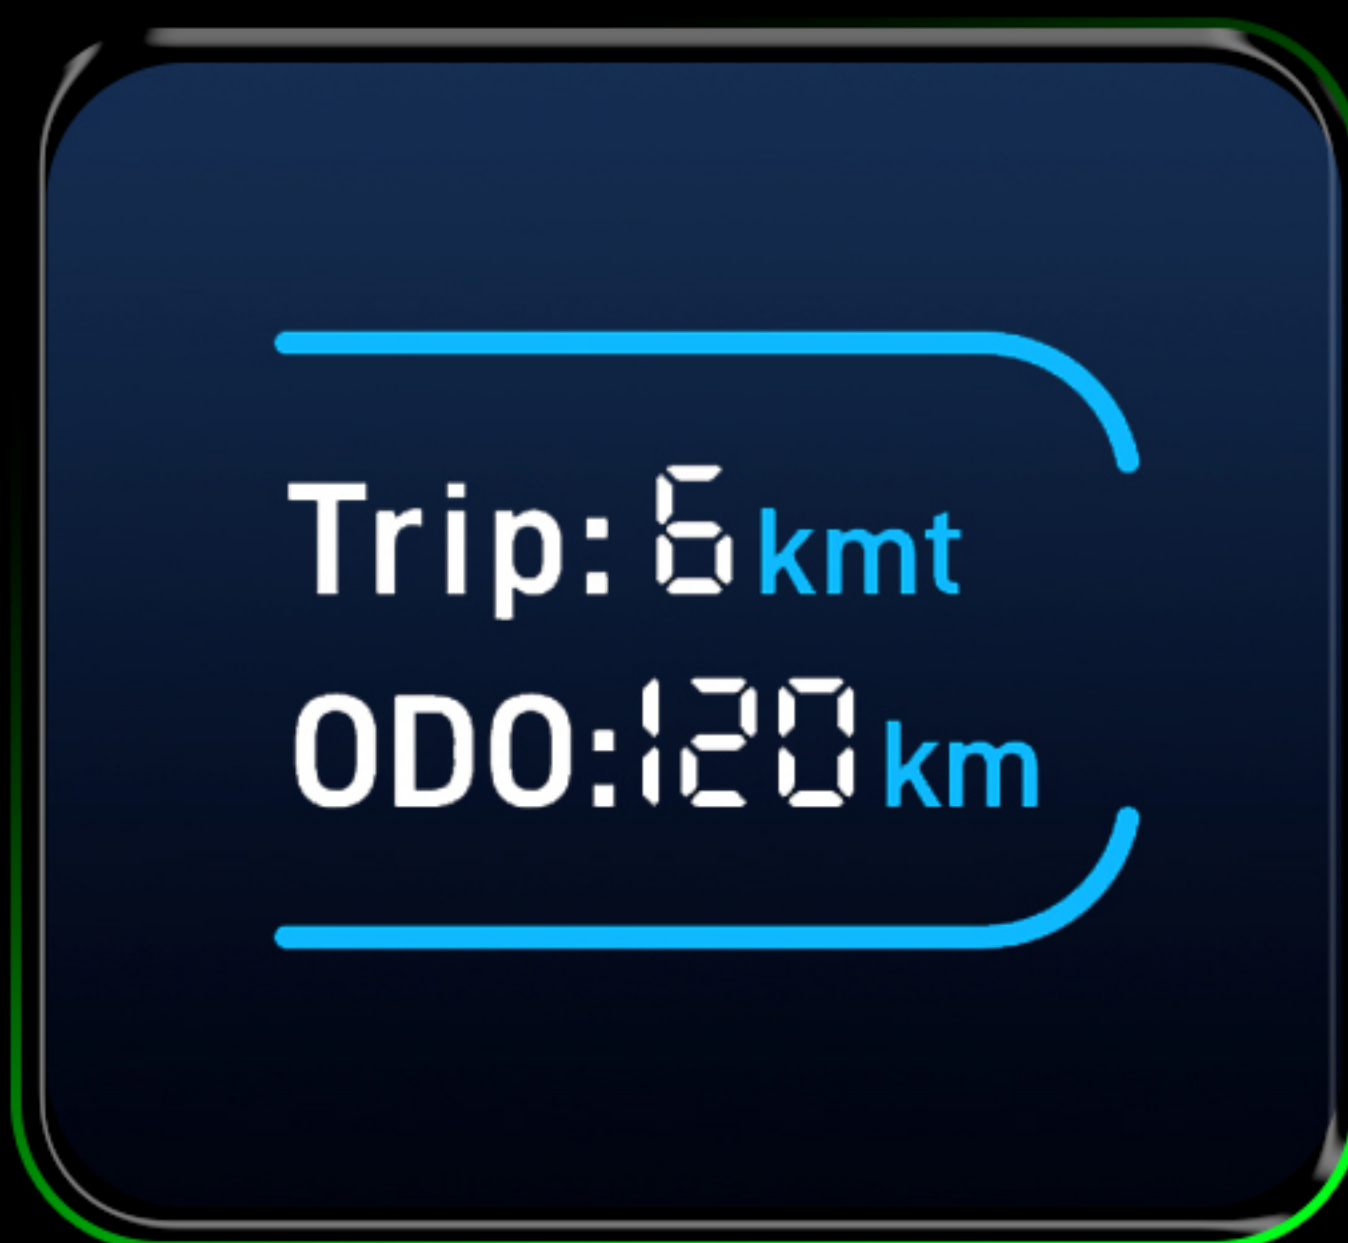

Comes with wireless remote for effortless speed/steering adjustment and precise handling. One-touch cruise control enables instant mastery, even for beginners.

Forward/Reverse Display

Forward/Reverse seamless switching.

Odometer Display

Track both trip and total mileage, adding a sense of ceremony to every journey.

Cruise Control

One-touch speed locking for hands-free operation, intuitively designed for instant beginner mastery.

Built in GPS

Records your distance and speed.

Type-C Charging

The remote features a built-in lithium battery that fully charges in just 2 hours for all-day operation.

Portable Design Easy Transport

Compact and lightweight at just 1780g. Features a standard 9-inch quick-release fin for tool-free installation/removal. Compatible with all small watercraft (inflatable boats, kayaks, canoes, transparent vessels, etc.) and SUP boards of various specifications.

When your target lies in farther waters

K4 Sport: Electric power for casual water fun, relaxed cruising and leisurely trips. Perfect for water adventures within 10 km.

3

Define your destination

Explore, traverse, or make round trips at fixed points.

4

Efficient Speed Racing

Suitable for advanced players and sports enthusiasts.

It delivers **consistent, stable and efficient** power output to help you **cut down travel time** on the water, saving more energy and time for reaching **farther destinations**.

When you have a clear travel destination, K4 Sport delivers efficiency and endurance to power your true long-distance journey.

Multiple Specifications To Meet Various Application Needs

(Need to be purchased separately)

B15 WATERPROOF BATTERY

Capacity: 1526WH

Voltage: TYPE-C: PD3.0

Waterproof Quick-Connect DC Port: 47.85v

Battery Life When Paired With K4S

Half throttle mode: **13 h⁺**

Full throttle mode: **15 min**

B20 WATERPROOF BATTERY

Capacity: 1920WH

Voltage: TYPE-C: PD3.0

Waterproof Quick-Connect DC Port: 48V

Battery Life When Paired With K4S

Half throttle mode: **17 h⁺**

Full throttle mode: **30 min**

B30 WATERPROOF BATTERY

Capacity: 3052WH

Voltage: TYPE-C: PD3.0

Waterproof Quick-Connect DC Port: 47.85V

Battery Life When Paired With K4

Half throttle mode: **30 h⁺**

Full throttle mode: **1h**

Waterproof Battery

Other Waterproof Batteries

Dual Input/Output

(TYPE - C / 1 Waterproof Aviation Plug)

Single Input/Output

(Single Function)

Premium High-capacity Cells, With Extreme Energy-to-volume Ratio

Large-sized, Occupying Much Space

(Inconvenient To Carry)

PD3.0 Fast Charge/Discharge

(Supports Power Supply To Other Mobile Devices <100W)

Only Supply Power To Dedicated Devices

(Limited Function)

1000-cycle Charging And Discharging

(Longer Lifespan)

400-cycle Charging And Discharging

(Shorter Lifespan)

Both A Waterproof Power Source And A High-capacity Power Bank

TYPE-C PD3.0 bidirectional fast charging not only enables high-power discharge, but also can quickly charge phones, laptops, drones and other mobile devices.

Suitable for

Saltwater & Freshwater

Important: This product can be used in both freshwater and saltwater. You must rinse it with freshwater after saltwater use, otherwise the machine's lifespan will be affected. When not in use, remove the main unit and battery and store them indoors. Try to avoid leaving it submerged in water for extended periods when not in use.

Remote Control Features

One-Touch Cruise Control for hands-free operation

Seamless forward/reverse switching with remote steering enables precise, agile control for effortless navigation enjoyment.

Real-time display of voltage, current, RPM, battery level, and speed for full voyage awareness.

Rudder trim adjustment

Trip distance & total odometer recording

Range: <15m

Standby Time: ~10 hours

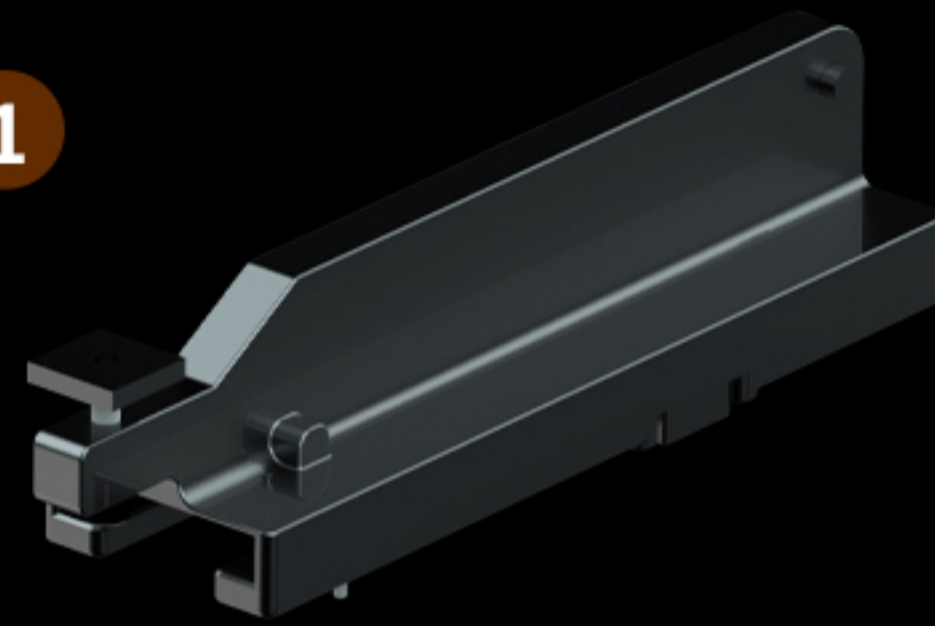

Charging: Type-C port (5V/2A input)
